Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 22-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6246232 the admitted prior art of [0004].

US 6246232 discloses a device including; a first part 15, said first part 15 being rotated continuously by rotation of the adjustment shaft 6, and a second part 13, said second part comprising a sliding part in the form of a rack. See figure 3. US 6246232 lacks the explicit disclosure of the use of the sensor in conjunction with an adjustment shaft of a brake. It is well known in the art and further admitted by [0004] to use sensors to detect movement of brake mechanisms. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize the sensor taught by US 6246232 in the environment of a brake mechanism as known in the art and further taught by [0004] to provide a brake mechanism with accurate detection over the entire range of movement. Also note *In re Leshin*, 227 F.2d 197, 125 USPQ 416 (CCPA 1960) regarding the obviousness of art recognized suitable structures/devices.

Regarding claim 23, see projection 6b.

Allowable Subject Matter

Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley T. King whose telephone number is (571) 272-7117. The examiner can normally be reached on 11:00-7:30 M-F.
